- Web-based client portal for remote access and management

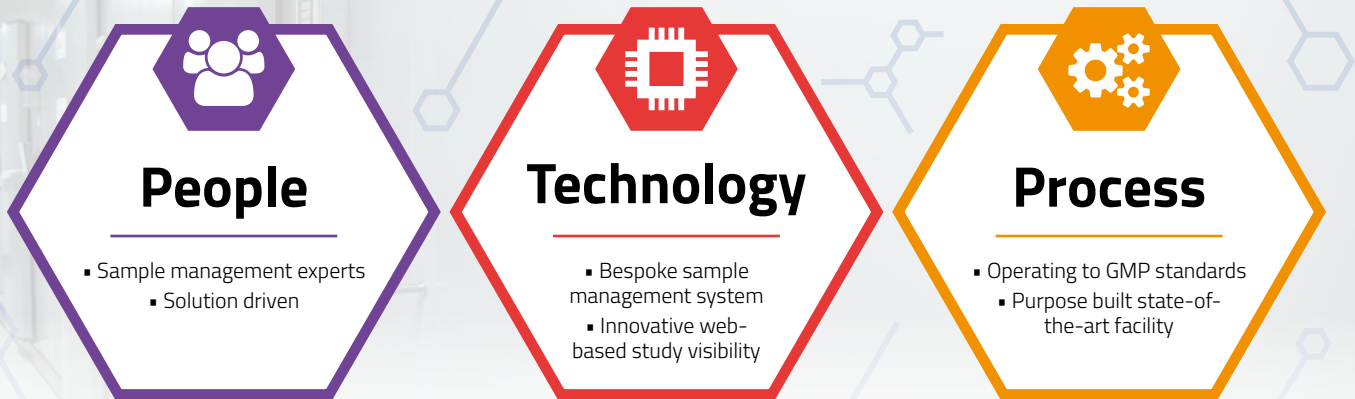

Storage Conditions

Full ICH range of conditions. Customised conditions as required.

"Q1 Scientific offers state-of-the-art environmentally controlled and monitored storage facilities across the full range of temperatures and humidities. Stability storage conditions for all key ICH climatic zones; suitable for long term, intermediate and accelerated stability trials."

Q1Scientific provides industry-leading temperature-controlled storage facilities and state-of-the-art technology solutions, to manage sample inventory. Q1 Scientific supports customers in maximising opportunities, minimising risk and reducing costs.

Why use Q1Scientific

Reduction and control of Costs: the Q1 Scientific 'Pay for use' model eliminates waste, unseen maintenance, service and security costs with no unexpected facility costs

Flexible Capacity: Q1 Scientific's capacity flexibility can change with your requirements making sure you have access to the storage as and when required

Focus on Priority: companies can concentrate on core activities central to the business, focusing on activity not infrastructure

Manage Risk and Compliance: Q1 Scientific offers primary or contingency storage solutions and disaster recovery capability

Transform CAPEX to OPEX: Reduction in capital investment in storage facilities and infrastructure, optimises utilisation and return on investment for existing stability infrastructure.

Other Services Provided
